

David Lindeman, PhD, is Director Health, Center for Information Technology Research in the Interest of Society (CITRIS), UC Berkeley and Director, Center for Technology and Aging (CTA). Dr. Lindeman has worked in the field of aging and health care for over 30 years. His current work focuses on the incubation, evaluation, and scaling of technology-enabled solutions for older adults and children, including innovations that address critical health care challenges through the use of mobile devices, sensors, telehealth, assistive technologies, data analytics, and other technologies. Dr. Lindeman serves as an advisor to foundations, government agencies, businesses, and venture firms and has numerous publications on research and policies related to health care and technology.
